Try the Infinity Suite with an AP-114 ISP/JTAG Programmer and see for yourself

Educational Discounts
All educational establishments can apply for discounts across our whole range of products

Universal Hardware Platform

The **AP-114 ISP/JTAG Programming System** provides a single, all-in-one solution for In-System Programming (ISP) of both JTAG and non-JTAG devices, Boundary Scan Testing, JTAG debugging and out of system device programming.

The **AP-114** supports all applications within the **Infinity Suite**, and supports any required JTAG pinout up to 14-pins. It supports JTAG, SPI, I2C and Microwire interfaces

JTAG Training Platform

The **JTAG Training Platform** is an ideal solution for Educational use and general equipment training. It provides everything required to help your understanding of JTAG Boundary scan testing, FPGA configuration and JTAG debugging.

Additionally, use the platform for ISP programming of Atmel AVR microcontrollers and SPI memory, and for development with Jennic JN5148 wireless microcontroller modules.
